HOLYGUARD

Security Network for Houses of Worship

Real-Time Incident Reporting | Team Coordination | Verified Network

iOS & Android | 2026

THE PROBLEM

Churches Are Under Threat

725+

Deadly attacks on U.S. churches since 1999

88%

Of churches have no formal security plan

0

Purpose-built apps that combine all security needs

Security teams at houses of worship rely on fragmented tools -- group texts, walkie-talkies, paper logs, and spreadsheets. There is no unified platform built specifically for faith-based security operations.

THE SOLUTION

HolyGuard: One App. Complete Security.

INCIDENT REPORTING

Report threats with photos, GPS, and categorized incident types in real-time.

TEAM COORDINATION

Channel-based messaging, direct messages, and role-based access for your security team.

WATCHLIST

Track persons of interest with photos, plates, descriptions, and linked incidents.

NETWORK MAP

See every verified house of worship in the network on a live map.

ORG VERIFICATION

Automated 4-check vetting ensures only real organizations can join the network.

RESOURCE HUB

Share training materials, best practices, and safety resources across organizations.

TRUST & VERIFICATION

Automated Organization Vetting

Every organization is scored out of 100 points. Score 60+ = auto-approved. Below 60 = manual review.

VERIFICATION CHECK	POINTS	HOW IT WORKS
Google Places API	**30 pts**	Confirms the address is a real place of worship on Google Maps
EIN / 501(c)(3)	**30 pts**	Validates tax-exempt status via IRS database (ProPublica API)

COMMON AUTO-APPROVE PATHS:

Google Places (30) + EIN (30) = 60 pts --> AUTO-APPROVED

Google Places (30) + EIN (30) + Email (25) = 85 pts --> AUTO-APPROVED

All four checks = 100 pts --> AUTO-APPROVED

Google Places (30) + Email (25) = 55 pts --> PENDING MANUAL REVIEW

CORE FEATURE

Real-Time Incident Reporting

How It Works:

1. **TAP THE RED BUTTON**
   One-tap access to report an incident
2. **CAPTURE EVIDENCE**
   Take a photo or choose from gallery, GPS auto-tagged
3. **CATEGORIZE & DESCRIBE**
   Select from 10 incident types, add description
4. **INSTANT ALERT**
   Team sees the alert in real-time on the live feed
5. **OPTIONAL: WATCHLIST**
   Link directly to a watchlist entry for tracking

10 INCIDENT CATEGORIES

- Trespass
- Graffiti
- Theft
- Assault
- Suspicious Person
- Medical
- Fire
- Active Threat
- Vandalism
- Other

PLATFORM FEATURES

Built for Security Teams

TEAM MESSAGING

- Organization-scoped channels (#general, #watchlist, etc.)
- Role badges on every message (Admin, Security, Member)
- Direct messages with invite-based consent system
- Cross-organization DMs with org badges
- Real-time delivery via Firestore listeners

WATCHLIST

- Track persons of interest with photos & license plates
- Three statuses: Active, Monitoring, Resolved
- Link incidents directly to watchlist entries
- Search by name, plate, description, or location
- GPS-tagged entries with physical descriptions

RESOURCE HUB

- 10 categories: First Aid, Active Shooter, Training, etc.
- Share across the entire network of organizations
- Documents, guides, best practices, past incident reports
- Searchable with category filters
- Organization-attributed for credibility

ACCESS CONTROL

Role-Based Permissions

SUPER ADMIN

Platform Governance

- Approve / reject organizations
- View all pending verifications
- Platform-wide oversight

ADMIN

Organization Lead

- Create channels & invite members
- Generate invite codes with role assignment
- Edit / delete all incidents & watchlist entries

SECURITY

Security Team

- Report incidents with photo evidence
- Manage watchlist entries
- Full access to team messaging

MEMBER

Congregation

- Report incidents
- View live feed & watchlist
- Access resources & send messages

COMPETITIVE LANDSCAPE

No Single Competitor Covers It All

	HolyGuard	Guard911	SaferWatch	SecurX	PushPulse	Locknow	Zello
